**THE
PROBLEM**

**THE
SOLUTION**

SOFTWARE SOLUTIONS

Too many companies rely on paper or spreadsheets to manage their safety program. Paper gets lost, or sits in a truck or at a worksite for weeks before reaching the office to be processed and assessed. And, keeping spreadsheets current and meaningful across a company is administratively intensive, difficult, and frustrating.

The alternative to paper and spreadsheets is safety management software. However, most applications are hard to use, difficult to integrate, take a long time to customize, and expensive.

Pilgrim
CONSULTING

With our program your Incident Reports, Hazard Reporting, Training, Inspections, and Corrective Actions are electronic, never is your documentation misplaced or delayed, your safety processes are defined giving you complete visibility into the safety of your company.

As a result incidents decrease, insurance costs remain competitive, and you can easily demonstrate that your company operates safely when bidding for the next job.

THE 4 MAIN BENEFITS OF USING OUR SOFTWARE ARE

01

COMPLETE
SAFETY MANAGEMENT SYSTEM

02

EASIEST
TO CUSTOMIZE

03

SIMPLE
TO USE AND SETUP

04

RAPID
DEPLOYMENT

USE OUR SYSTEM TO:

- Conduct Job Hazard Assessments (JHAs) and create a library accessible online and offline
- Complete Field Level Hazard Assessments (FLHA).
- Relate JHAs to positions and automatically calculate overall position risk
- Document worksite and equipment inspections and assign remedial tasks
- Reference JHAs reviewed and signed off on during field level risk assessments
- Track leading and lagging indicators
- Automatically send notifications to other responsible people within the company
